

## S.28.01. - Minimum Capital Requirement (except for composite undertakings)

### General comments:

This Annex contains additional instructions in relation to the templates included in Annex I of this Regulation. The first column of the next table identifies the items to be reported by identifying the columns and lines as showed in the template in Annex I.

This annex relates to opening, quarterly and annual submission of information for individual entities.

In particular, S.28.01 is to be submitted by insurance and reinsurance undertakings other than composite ones. Composite insurance and reinsurance undertakings shall submit S.28.02 instead.

This template should shall be completed on the basis of Solvency II valuation, i.e. written premiums are defined as the premiums due to be received by the undertaking in the period. Applying this definition means that written premiums in the given year are the premiums actually due to be received in that year, regardless of the coverage period. The definition of written premiums is consistent with the definition of “premium receivables”.

The calculation of MCR combines a linear formula with a floor of 25% and a cap of 45% of the SCR. The MCR is subject to an absolute floor depending on the nature of the undertaking (as defined in Article 129 (1) (d) of the Directive 2009/138/EC).
